MAJOR PROJECTS HANDLED

Title	Sharp Token		
Client	Sharp Innovation Foundation	**Role**	Project Manager
Environment	Polygon, Alchemy, Polygonscan		

Scope:

Sharp Token is the digital fuel for thriving, growth-focused, and purpose-driven communities. Created on a robust and scalable blockchain, powered by AI, our utility token revolutionizes the way communities grow, engage, and create value. Users can spend their Sharp Tokens on the Platform by investing in their personal and professional growth via exclusive content, videos, training, certifications, live events, webinars, job fairs, employment matching, and virtual conferences. Sharp Tokens can also be used to hire experts within the Platform for a variety of services such as one-on-one mentoring, career coaching, and resume creation.

Title	Sharp Rewards App		
Client	Sharp Innovation Foundation	**Role**	Product owner
Environment	Polygon Blockchain, Alchemy, JIRA, Azure boards, Microsoft Planner		

Scope:

The Sharp Economy represents the first AI-driven growth economy tailored for purpose-oriented communities, brands, and educational institutions. Its primary objective is to foster member growth through innovative models such as Learn2Earn and Spend2Grow. Gamifying continuous learning and member growth is goal of the sharp economy.

Title	MAPay Credentialing Application		
Client	MPayz LLC	**Role**	Technical Lead, DBA
Environment	.Net 6, Radzen Blazor, PostgreSQL, Microsoft Azure, Algorand Blockchain		

Scope:

The MAPay Credentialing app is a secure blockchain-based platform for healthcare providers seeking valid credentials from the Bermuda Health Council (BHC). It stores credentials on the Algorand blockchain using our proprietary algorithm for integrity and immutability. Verification is effortless via our mobile app, ensuring convenient and reliable authentication. Our goal is to revolutionize credentialing, providing a seamless and trustworthy platform for healthcare professionals.

App Link: MAPay Credentialing Application

Title	MPayz Wallet Application		
Client	MPayz LLC	**Role**	Technical Lead, Developer
Environment	Django, Python 3, PostgreSQL, Microsoft Azure, Algorand Blockchain		

Scope:

MPayz Wallet is a customized wallet designed specifically for the Algorand standard asset called "MPayz Token." This user-friendly application allows you to effortlessly send, request, and view transaction history for both Algo coin and MPayz Token. Moreover, it offers an additional feature for securely storing healthcare data using Non-Fungible Tokens (NFTs). Individuals are assigned a unique NFT that corresponds to their personal data. The wallet incorporates essential functionalities and adheres to industry benchmarks for optimal performance and security.

Title	C# Corner MVP Program		
Client	C# Corner	**Role**	Program Director

Scope:

C# Corner MVP program is designed to recognize and honor professionals and tech enthusiasts who actively contribute to the community through their valuable contributions, such as writing articles, blogs, answering forum questions, and speaking at conferences and chapter events. As a token of appreciation for their efforts in helping others, we present MVPs with exclusive benefits, including MVP kits and rewards like a free pass to the annual conference. This program serves as a way to acknowledge and celebrate the dedication of individuals who go beyond in sharing their expertise and knowledge within the C# Corner community.

Title	Stratis Blockchain Student Hackathon		
Client	Stratis Blockchain	**Role**	Organizer, Judge
Environment	Stratis Blockchain, C#.Net		

Scope:

Stratis Blockchain Student Hackathon was an exciting and immersive online event spanning over a week. Participants were challenged to develop innovative and functional solutions using Stratis Blockchain SDKs (Unity, Python, C# .Net, Unreal Engine), focusing on various industries. These included banking and financial services, international trade and commodities, supply chain, energy, identity, Internet of Things, government, healthcare and medicine, automotive, and gaming. The hackathon provided an opportunity for students to highlight their skills and creativity by building cutting-edge solutions that address real-world challenges in these industries using blockchain technology.
